PROFILE

Full-stack software engineer with 3+ years of experience building websites and mobile applications, including AI meeting features and life-insurance workflows. Hands-on experience with TypeScript, React, React Native, Rust, and PostgreSQL, including query optimization and real-time data synchronization.

EXPERIENCE

Ludotech | Software Engineer

Jan 2025 - Present

Quarzo Life | Life Insurance Platform

- Contributed to life-insurance workflows for death settlements, one-time premium payments, and recurring premium requests within a six-engineer team.
- Contributed to data encryption across multiple application contexts, supporting GDPR compliance efforts.

Cockpit | AI-Powered CRM & Meeting Intelligence

- Built GPT-powered Playbooks to detect user-defined meeting topics and generate summaries.
- Developed features for the meeting video player and call transcripts using Rust and HTML.
- Contributed to the V2 migration from HTMX to React and implemented real-time updates with ElectricSQL.

Pabau | Software Engineer

Jan 2023 - Jan 2025

- Cut the execution time of a PostgreSQL query used to generate chart data from **60 seconds to 3 seconds (95% reduction)** by adding indexes and optimizing the query.
- Developed report export functionality for a clinic reporting module covering stock, pricing, items, and charts.
- Built and maintained unit tests and Playwright end-to-end tests to prevent regressions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust, HTML, CSS

Frontend: React, Next.js, React Native

Backend & data: NestJS, Deno, PostgreSQL, MySQL, ElectricSQL

Tools & testing: Git, Docker, Playwright, unit testing; monorepo and CI/CD familiarity

SELECTED PERSONAL PROJECTS

Smart Termin | SaaS Booking Platform | Live / GitHub

Built a booking platform for beauty professionals, focusing on the React frontend and MySQL database. Features include appointment scheduling, client management, and analytics.

Moj Prevoz | Ride-Sharing Mobile App | App Store

Built a published ride-sharing app, focusing on the React Native frontend and database. Features include ride listings, route filters, live messaging, and location sharing.

EDUCATION

Software Engineering Bootcamp | Seavus Education & Development Center | 2022 - 2023

Computer Technology & Automation | SOU "Nikola Karev", Strumica | 2018 - 2022
