

ANTONIO PAVIC

Full Stack Software Engineer

antoniopavic.dev@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#) | Skopje, North Macedonia

SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable SaaS, insurance, healthcare, and AI-powered applications. Experienced in TypeScript, React, Next.js, NestJS, PostgreSQL, Deno, and Rust, with a proven track record of delivering high-performance systems, real-time collaboration features, and AI-driven product experiences.

WORK EXPERIENCE

Software Engineer – Ludotech

Jan 2025 – Present

Quarzo Life — Core Insurance Platform

- TypeScript • Deno • PostgreSQL • React • Next.js
- Developed execution-context logic responsible for processing fund-to-fund transfers, enabling users to switch investments between funds reliably.
- Built the single premium request feature, allowing users to deposit funds into their account and manage one-time premium payments.
- Implemented recurring premium request functionality with comprehensive test coverage.

Cockpit — AI-Powered CRM & Meeting Intelligence Platform

- Rust • React • OpenAI API • PostgreSQL
- Built GPT-powered Playbooks that detected user-defined topics during meetings and generated AI-powered summaries.
- Contributed to the V2 migration from HTMX to React and implemented real-time synchronization using ElectricSQL.
- Developed multi-user invitation workflows with email invitations, invite links, and real-time updates.

Software Engineer – Pabau

Jan 2023 – Jan 2025

Healthcare Platform

- Next.js • NestJS • PostgreSQL
- Contributed to the platform's reporting module as part of a 7-engineer team, delivering analytics and reporting features across clinic performance, revenue, expenses, leads, inventory, product usage, and operational metrics.
- Optimized data-intensive graph and reporting endpoints by implementing PostgreSQL indexes and refactoring inefficient query-processing loops, reducing response times from 60+ seconds to under 3 seconds (95%+ improvement).
- Built and maintained automated test coverage using unit and Playwright end-to-end tests, helping ensure application reliability and preventing regressions.

EDUCATION

Computer Technology & Automation

SOU "Nikola Karev", Strumica | 2018–2022

Software Engineering Bootcamp

Seavus Education & Development Center | 2022–2023

KEY SKILLS

- TypeScript
- React
- Next.js
- PostgreSQL
- NestJS
- Rust
- OpenAI API
- Playwright
- Performance Optimization
